Lab 09a - Implement Web Apps

In this lab, we will:

- Task 1: Create an Azure web app
- Task 2: Create a staging deployment slot
- Task 3: Configure web app deployment settings
- Task 4: Deploy code to the staging deployment slot
- Task 5: Swap the staging slots
- Task 6: Configure and test autoscaling of the Azure web app

The number of instances:

Hosting

Plan Type	App Service plan
Name	ASP-az10409arg1-b154
Operating System	Linux
Instance Count	2
SKU and size	PremiumV3 (P1v3) Scale up

Default domain   : my-web-app-azure.azurewebsites.net

App Service Plan : ASP-az10409arg1-b154 (P1v3: 2)

Operating System : Linux

Health Check   : Not Configured
